

GE Sensing

Features

- Pressures to 10,000 or 15,000 psi
- Compatible with distilled water, alcohol or mineral oil
- Quick priming function
- Optional adjustable pressure relief valve

The PV212 is a high quality hand pump designed to quickly and easily generate hydraulic pressures. The materials of construction make it compatible with most fluid media and an optional seal kit can be supplied for many aggressive applications. The built-in vernier provides excellent control and is easy to adjust even at high pressures.

The dual stage pump includes a selector valve which increases the priming speed and greatly reduces the effort required to generate high pressures. An optional pressure relief valve can be supplied to provide protection to connected instruments.

- Hydraulic pressure sources for pressures up to 15,000 psi
- Large volume Pyrex™ reservoir which can be filled during operation
- Vernier adjust for fine control
- Quick priming and pressure generation
- Optional pressure relief valves
- Pressure release valve offers outstanding control for decreasing pressures
- "Skydrol", "Fyrquel", brake fluid option available

PV212

Druck Hydraulic Hand Pump

PV212 is a Druck product. Druck has joined other GE high-technology sensing business under a new name—GE Industrial, Sensing.

PV212 Specifications

General

Ranges

- PV212-10K (0 to 10,000 psi)
- PV212-15K (0 to 15,000 psi)

Materials

Series 300 stainless steel, brass, nickel plated brass, Pyrex™, Nitrile, polyurethane and PTFE

Dimensions (l x w x d)

9 in x 6.25 in x 2.75 in

Weight

Approximately 3.2 lb

Ordering Information

Record selected option in blank indicated at bottom of form.

- 1) Type number
- 2) Option S: Skydrol/Fryquel (if required)
- 3) Option HA: Accessory case (if required) PV212-10K-HA or PV212-15K-HA

Model	Ranges
PV212	10K 10,000 psi
	15K 15,000 psi

PV212 - Use this number to order product

For service kit specify P/N: IAS-A112-1 for PV212-10K or IAS-A112-2 for PV212-15K

PV212 Accessories

HK15 High Pressure Hose Kit

15,000 psi Working Pressure

The HK15 is a quality high pressure hose kit designed to operate with the PV212. The standard stainless steel/nylon construction is suitable for use with oil or water and optional seals can be provided to accommodate 'Skydrol' and brake fluid.

The HK15 offers the following:

- Self-sealing fittings—finger tight connections
- Low volumetric expansion—negligible pressure drop
- Heavy duty construction

HK15 Specifications

Working Pressure

15,000 psi

Minimum Burst Pressure

36,200 psi

Minimum Bend radius

2.25 in

Working Temperature

-22°F to 176°F

Construction

Nylon, stainless steel, brass, PTFE, nitrile

Outer Diameter

0.25 in

Bore

0.13 in

Fluids

Water and oil standard, 'Skydrol' or brake fluid versions available

PV212 Accessories

PRV212 Adjustable Pressure Relief Valves

The PRV212 is a pressure relief valve designed for use with the PV212 Series of hydraulic hand pumps to provide overpressure protection to instruments under test. The PRV212 mount directly on to the PV212 and are supplied in factory preset configurations which can be adjusted for specific requirements.

PRV212 Specifications

Material

303 stainless steel

Seals

Polyurethane, PTFE, nitrile, nylon

Fluid Media

Mineral oil, distilled water, 'Skydrol' version optional

Maximum Working Pressure

15,000 psi

Dimensions

1.6 in x .87 in diameter

Weight

2.1 oz

Accuracy/Repeatability

±10% nominal setting

PRV212 Ordering Information
